

**THE REVOLUTIONARY COMMITTEE OF S08-16**  
WITH SUPPORT FROM THE REPUBLIC OF SITAKU

Dear AMITdoubleP,

**We have heard your dreams for war. We have heard your aspirations.** We have heard your declaration, we have heard your desires.

Despite how we respect the rights and dignity of the individual, we cannot possibly take the prospect of an invasion from you. Our existence is founded on the basis of freedom and democracy, the respect of the individual, and the ability to voice one's concerns, all while enjoying the process. Thus, we deeply distrust your ideologies and running of your party.

It is imperative for us to defend RCS08-16 as the sole leading party of the room, under the mandate of Marcos. Through our works and achievements, we've successfully stuck to our ideologies and have protected what many faithful citizens call home. Events were held, and peace prevailed. Unlike us, your party, that can be described in two words, which are disorganized and inhumane, is almost guaranteed to break this peace and cause chaos among the citizens, creating a dystopia.

It isn't just our ideologies, it is also our material properties. Our archival papers and the very platform for students to share their beliefs and opinions, the COE, are missing; notably, half of the stack containing all of the war letters and other prominent papers.

You have declared war on us, but no actions were taken. Instead, the cowardly theft of neutral historical archives were taken out of spite. Please, if you all are going to be that bold and making such claims, I ask you,

**Come at us.** (not on eviction days)
